Scenario:
Try Delete
User data

☺   (5ca5d365713b599446e9f890592 56ab039cbf372f0d07cc91b813262fa1c1f.html)   ◉   ∞   (5ca5d365713b599446e9f890592 56ab039cbf372f0d07cc91b813262fa1c1f.html)

Scenario:
Try delete
with Invalid
ID User

Scenarios

Scenario: GET ALL data user (4b2ffef63b07c15ad879a49a5b94c77b72863c7ad07d8460fb580d02ea5dc9d.html)

Given set the GET ALL user data endpoint
When send the HTTP Request GET ALL user
Then i got verify code 200
And I try to check content of get all by id 1

Scenario: get all data user with parameter method (ccf3f7aac1f947d9cfd9fef5b25bfb9aea5c748345a3fb482192 96ad6858e1f3.html)

Given I set to get all user with parameter endpoint
When I send that request to get all data user
Then I receive response code HTTP
And I try to check the body

Scenario: GET data as admin able to get detail data user (4bedf013b3b384fb642ae85b73e09bbf3749fc1300786109bc554b91a70ec035.html)

Given I set GET api endpoint
When I send GET HTTP request
Then I receive valid HTTP response code 200
And I receive valid data for detail

Scenario: Get data by over id user number (8a7f6ee22f44b1e8ddf1e88356e21c6361ef2e348dd1fb67059f806cb8734 22d.html)

Given set GET API endpoint link
When I send request with invalid id user
Then I will get 404 Not Found Response

Scenario: POST new data user (c247067d28339d69ff6ac66779b11e89b331852c1f7af30477e6f3f3c03114c3.html)

Given I SET post API endpoint
Then I receive valid response code 200
When I send POST HTTP request
And I receive New data user

Scenario: POST new user data with some invalid requirement (0341e2d13206fbceb9d71d9bc9348007f33b0bd201f39d6ec825a7c1b9f2e418.html)

Given set the endpoint post invalid
When I send request for post on existing user id
Then I will get eror code 404

Scenario: PUT an update data for existing user (b56923ec985c2005275025fe4cba7bec0f022a2af1c4158a50da11b6760c3c81.html)

Given I set PUT api endpoint
When I send PUT HTTP request
Then I receive HTTP code 200
And I receive valid data for update user data

Scenario: Test PUT update data with invalid userId (efe422bf8e874dbd6677e1bbba3e4607133932df5d2d99b586f54f0947f42927.html)

Given I set PUT endpoint
When I send PUT invalid HTTP request
Then I receive HTTP code 404
And I receive warning error from HTTP Code

Scenario: Try Delete User data (d08c2751f0ac9c4fbf094f024b92d10562d26790375c5ec543c2e0923c6d0a57.html)

Given set the delete user endpoint
When send the delete request HTTP
Then receive code 200 HTTP code
And I try to recheck the existed data

Scenario: Try delete with Invalid ID User (5ca5d365713b599446e9f890592 56ab039cbf372f0d07cc91b813262fa1c1f.html)

Given I set Delete with invalid user endpoint
When I send delete negative request
Then I verified with code response HTTP
